SPANCRETE MACHINERY CORPORATION HOSTS DELEGATION FROM RUSSIA FAR EAST

Spancrete Machinery Corporation hosted a U.S. Department of Commerce SABIT sponsored delegation of twenty precast and construction officials from the Russia Far East region. The Special American Business Internship Training (SABIT) Program delegation visited Spancrete Machinery's corporate headquarters and manufacturing facilities in Waukesha, Wisconsin.

The visit was part of a three-week program to introduce the delegation to U.S. industry trends, processes and equipment involved in energy efficient construction and assist them in establishing contacts with potential partners. Topics of interest included materials, construction processes, renewable energy, certification, design, and other related issues.

Spancrete was chosen by the U.S. Dept. of Commerce to highlight the latest precast technology in the United States.

With over 60 years of experience, Spancrete Machinery Corporation is a leader in the precast, prestressed concrete industry. Spancrete Machinery Corporation manufactures a variety of top-of-the-line systems for the production of hollowcore floor and wall panels and markets the equipment worldwide. Its parent company, The Spancrete Group, Inc., operates its own local precast production facilities in Wisconsin, Illinois and Florida. Production, engineering and marketing personnel and facilities are available to new producers for support and training purposes.
