Spancrete Machinery Corporation Hosts Annual Operator Workshop

(Waukesha, WI) Spancrete Machinery Corporation recently continued their 20 year tradition by hosting the Spancrete Manufacturers' Association's Annual Operator Training Workshop. The workshop took place at Spancrete Machinery's Research & Development Center in Waukesha, Wisconsin. Over 40 individuals representing 14 Spancrete producer companies were in attendance for the intensive three-day hands-on operations seminar. Specifically designed for existing operators, the session provided a refresher course and workshop that focused on the ease of maintenance and set-up on a Spancrete machine and new machinery developments.

"The Operator Workshop was the best one I have attended. The hands on approach combined with preventative maintenance and in depth training of the hydraulic system surpassed my expectations. I look forward to sending other employees next year," Anthony Grande, Vice President of Operations, Cement Industries.

"It is our pleasure to attend your Spancrete Operator Workshop. We really increased our knowledge with the latest updated production procedures and the school helped clarify some technical question about machinery operation. It was a good opportunity to learn that we are not alone in world, but we are in a Spancrete community. The school allowed us to meet with world wide Spancrete producers, and enabled us to discuss all of the benefits of being Spancrete producers," H.Gebaly, Sales Manager, Samcrete Egypt.

The training workshop is a part of Spancrete Machinery's continuing educational commitment to producer companies who have invested in Spancrete machines. For the last 20 years, Spancrete machinery has been working to put on these types of seminars for their producers.

"The Operator Workshop reinforces the line of communication between a diverse group of Spancrete machine operators, with attendees discussing various issues and helping resolve each other's questions," says Joseph T. Dugan, Vice President of Spancrete Machinery Corporation. "Our machinery policy encourages all Spancrete producers and their machine operators to openly share their knowledge and ideas. It's a system that truly helps foster innovation."

Spancrete producer companies in attendance included:

Cement Industries, Inc - Fort Myers, Florida
Conewago Precast Building Systems - Hanover, Pennsylvania
Florida Precast Industries, LLC - Sebring, Florida
Hanson Structural Precast Midwest, Co. - Maple Grove, Minnesota
Hanson Structural Precast Pacific, Co. - Irwindale, California
Hevesbeton Kft. - Heves, Hungary
Oldcastle Precast, Inc. - Manchester, New York
Pretersa-Prenavisa, S.L. - Teruel, Spain
Samcrete Egypt -Sami Saad & Co.- Cairo, Egypt
Spancrete Caribbean Ltd. - Trinidad, West Indies
Spancrete, Inc. - Valders, Wisconsin
Spancrete Industries, Inc. - Waukesha, Wisconsin
Spancrete of Illinois - Crystal Lake, Illinois
Spancrete of Japan - Tokyo, Japan

With over 60 years of experience, Spancrete is a leader in the precast, prestressed concrete industry. Spancrete Machinery Corporation manufactures top-of-the-line systems that produce Spancrete hollowcore slabs and insulated and non-insulated wall panels and markets the equipment worldwide. Its parent company, The Spancrete Group, Inc., operates its own local precast production facilities in Wisconsin and Illinois. Production, engineering and marketing personnel and facilities are available to new licensees for support and training purposes. The Spancrete Manufacturers' Association meets on a regular basis performing continual technical, operational and marketing research and development for both the Spancrete product and the precast concrete industry.
